COLLECTIVE SERVICES	
Type of collective service	Maximum financial assistance
Group analysis of technico-economic management (with data transmission to Agritel)	5 000 \$ for a group of 30 people (50 \$ by additional business)
Pest and disease monitoring for cash crops (with data transmission to RAP)	Based on cost evaluation done by the MAPAQ cash crop counsellor
Information and demonstration day at the farm, convention and conference	Case-by-case; submit the demand at least 30 days before the event

i For all individual services, a business can have a maximum financial assistance for a given financial year (from April 1st of the current year to March 31st of next year) :

- ✓ Non emerging productions (dairy and beef production, pasture and forage crops) : 1 000 \$
- ✓ Emerging productions (all other productions) : 2 000 \$

This maximum amount excludes horticultural pest and disease monitoring, farm succession services as well as PADEA financial assistance. As soon as there is an emerging production, the maximum financial assistance goes up to 2 000 \$ (whatever the main production is), as long as the technical counselling services are provided for the emerging production..

- ii Whatever the animal or crop production is (emerging or non emerging production), any business that is certified organic or in transition can have technical counselling service (animal production management or crop production management) subsidized at 75 %, for an amount up to 2 000 \$.
- iii Some conditions apply.
- iv Label design, printing and laboratory analyses costs are not eligible.
